

ALUMINUM

**Rugged reliability
year in and year out.**

With its simple, sturdy, and solid construction, the aluminum side wall has long been the industry standard. And for added muscle, we include a lightweight galvanized-steel frame incorporated into the structure of each side wall.

That's why our aluminum side walls provide you with:

Proven solid sheet-and-post construction

A versatile side wall that's right at home on a variety of truck bodies

Smooth, pre-painted white panels with rivets

Hassle-free service options
